

EuRec gains its first sales partner for Germany with Fischer and Schweiger

Focus on high-performance two-shaft shredders in Bavaria and Baden-Württemberg

[Fischer und Schweiger GmbH](#) is the first official sales partner for the EuRec brand on the German market. The family-run company based in Zusmarshausen-Wollbach is now responsible for sales and service for the federal states of Bavaria and Baden-Württemberg.

Fischer und Schweiger has been an established provider of construction machinery, handling technology and technical services for decades. As a long-standing partner of the Sennebogen brand, the company has built up an excellent reputation in the recycling and waste disposal industry thanks to its high level of technical expertise, reliable customer service and regional proximity. With the addition of the two-shaft shredders from EuRec, Fischer und Schweiger is expanding its portfolio to include innovative solutions for material recycling.

The partnership will focus on three machine types from the EuRec brand:

- [INFINITY 750](#) – The compact two-shaft shredder for homogeneous output material in the processing of natural and waste wood
- [ULTIMA 850](#) – The flexible solution for a wide range of applications in the field of waste wood, green waste, commercial waste, rubber and used tyres
- FERRO 950 – The new flagship of the EuRec brand with almost 1,000 hp drive power, which celebrated its premiere at bauma 2025 and sets new standards, especially for particularly demanding materials such as scrap metal or car bodies

The new partnership will be supported by Lennart Stecher, sales representative at EuRec, who has been well-known and active within the industry in southern Germany for many years. With his comprehensive product knowledge and detailed market expertise, he will support Fischer und Schweiger GmbH with advice, sales and technical support for the high-performance EuRec shredders. Together, EuRec Environmental Technology GmbH and Fischer und Schweiger GmbH are building a strong partnership that will inspire customers from southern Germany with innovative technology and first-class service in the future.
