

Pollutec 2025: EKOMAXX 800 C&D opens up new recycling perspectives

Joint trade fair appearance in Lyon with French distribution partners

The international environmental and recycling trade fair [Pollutec](#) is one of the most important industry meeting points in Europe. From 7 to 10 October 2025, ARJES GmbH will be presenting its successful [EKOMAXX 800](#) in Lyon - a mobile two-shaft shredder that is recommended for other exciting areas of application in the future.

France has been one of the most important markets in the recycling industry for many years. With growing interest in solution-orientated machines, the country is increasingly taking centre stage as one of Europe's core markets. With its renewed participation in Pollutec 2025, ARJES is pursuing the goal of strengthening its existing dealer structure, establishing new contacts and further expanding its close collaboration with partners and customers.

In order to meet customer expectations and market requirements, the EKOMAXX 800 - in addition to the COMPAKTOR 300 - is now also being approved for shredding construction and demolition waste. After several successful test runs with concrete shafts, the ARJES intermediate class two-shaft shredder has also proven itself reliably in this demanding material sector. The EKOMAXX 800 thus remains true to its well-known high performance and at the same time offers even more flexibility for additional areas of application.

At Pollutec 2025, ARJES and its sales partners [STARLOC](#), [PROPEL](#) and [SOMATEC](#) will be presenting the wide range of possible applications of the EKOMAXX 800. Visitors are cordially invited to find out about all the advantages of the mobile two-shaft shredder in a convivial atmosphere and gain additional insights into the entire ARJES performance spectrum.

Visit ARJES and its French distribution partners at Eurexpo Lyon for Pollutec 2025 - Hall 3, Stand B155 - and get your free trade fair ticket now! 🖱️ [Register here for free](#)
