

New Momentum for the Austrian Recycling Market

BAG Klösch becomes official ARJES Sales and Service Partner in Austria

Since the beginning of the year, [BAG Klösch](#) has been responsible for the sales and service of the entire ARJES GmbH product portfolio in Austria, bringing not only extensive industry experience but also a high level of technical expertise in processing and recycling technology. The independent company, headquartered in Klösch, has been successfully operating since 2012 in the field of mobile and stationary crushing and screening plants as well as customized special solutions for the natural stone and recycling industries. BAG Klösch benefits from decades of practical experience, a strong service network, and supports customers from a wide range of recycling and construction material sectors.

The new partnership is supported by ARJES sales representative Lennart Stecher, who is highly familiar with the Austrian market and its specific requirements for modern shredding technology. From the very beginning, he has advised the BAG Klösch team and supported not only successful sales and product training sessions, but also the strategic introduction of [ARJES machines](#) to the Austrian market. In the future, Christoph Ulrich from BAG Klösch will serve as the direct contact person for sales and technical consulting related to ARJES machines for customers and interested parties throughout Austria.

The first visible sign of the cooperation did not take long to appear: immediately after [IFAT Munich 2026](#), the first ARJES [COMPAKTOR 300](#) was delivered to BAG Klösch. With its eye-catching “Still on Fire” design, the mobile two-shaft shredder already attracted significant attention at the trade fair stand in Munich and quickly became a true crowd-puller. The machine is now starting its demonstration tour and is literally bringing new “fire” to Austria. Wherever the COMPAKTOR 300 appears, strong interest, impressive shredding performance, and hands-on live demonstrations are guaranteed.

“With BAG Klösch, we have gained a strong and experienced partner who shares our philosophy and our commitment to customer-oriented solutions. We are looking forward to a successful collaboration, many joint projects, and further expanding our base of satisfied end customers and operators in Austria,” emphasizes Lennart Stecher.

Press Release: May 02, 2026
